

CAPABILITY STATEMENT

CORE COMPETENCIES: Watercat helps mission-driven clients (e.g. government agencies, associations, nonprofits, and private entities) to incorporate innovative solutions to sustainable water management by facilitating understanding and communication and building communities:

Policy & Program Review

- * Monitoring legislation and agency initiatives to develop science-based innovative policies
- * Evaluating agency programs to identify project funding and resource and leverage opportunities

Education & Outreach

- * Planning and executing programs for forums, conferences, and community building efforts around water
- * Developing communication strategies and community action opportunities

Surveys & Analysis

- * Reviewing and analyzing alternatives; technical and policy mechanisms
- * Compiling databases and case studies
- * Preparing “apples to apples” comparison reports for assessment of technology and policy alternatives
- * Developing benchmark studies and model water management programs
- * Developing analytical approaches and interactive decision support materials

Past Performance

Water, Energy, and Climate Change
